

Guaifenesin

Revised: October 31, 2018.

CASRN: 93-14-1

Drug Levels and Effects

Summary of Use during Lactation

Neither the excretion of guaifenesin in milk nor its effect on breastfed infants have been studied. It is unlikely that with usual maternal doses amounts in breastmilk would harm the nursing infant, especially in infants over 2 months of age. It is best to avoid the use of products with a high alcohol content while nursing.
