

Tucatinib

Revised: January 18, 2021.

CASRN: 937263-43-9

Drug Levels and Effects

Summary of Use during Lactation

No information is available on the clinical use of tucatinib during breastfeeding. The manufacturer recommends that breastfeeding be discontinued during tucatinib therapy and for 1 week after the last dose. However, tucatinib is used in combination with trastuzumab and capecitabine. It is recommended that breastfeeding be suspended for 7 months after the use of trastuzumab.
