

How do I Update Data I've already Submitted?

Created: April 9, 2008; Updated: June 15, 2010.

I've loaded data to dbSNP, but see now that I need to change some of it. Can I do that?

1. You can update data from a variation batch submission by doing the following:
2. Login to the [Human Variation Batch Submission](#) website.
3. Locate the submission you want to update in the "Completed Submissions" section and click on the submission to open it.
4. Click the "update" button and follow the instructions.

Please note: the new data used to update a selected submission will entirely replace any previously submitted data for that submission. (04/13/08)
