

Appendix F. Participant Post Intervention Survey – Usual Care Arm

CHICOS

Post Intervention Survey – Usual Care Arm

1) During the clinical visit, did you discuss the HPV vaccine with the medical provider?

Yes → complete the rest of the survey

No → Hand the survey back to the research assistant.

2) Which best describes the discussion about the HPV vaccine

We talked about the vaccine, but the vaccine wasn't offered to be given today

→ Hand the survey back to the research assistant if you selected this choice

The provider offered the vaccine, but I decided not to get it → continue survey

The provided offered the vaccine, and I received a dose today → continue survey

3) Thinking about this decision, please answer the following questions.

	Yes	No
Do you feel sure about what is the best choice regarding the vaccine?		
Do you feel like you know enough about what are the benefits and risks of getting the vaccine versus not getting the vaccine?		
Are you clear about which benefits and risks matter most to you?		
Do you feel like you have enough support and advice to make a decision about whether or not to get the vaccine?		

That's it! Thank you. Please hand the survey back to the Research Assistant. She will process your payment.
